PROFILE

I am a junior Frontend Developer My dedication to learning and staying updated on emerging technologies enables me to contribute effectively to projects and collaborate with teams. I am eager to further refine my skills and advance within the industry, seizing every opportunity to enhance my expertise and deliver high-quality solutions.

EDUCATION

Addis Ababa University

10/2019 – 07/2024

I am currently pursuing a degree in Electrical and Computer Engineering at Addis Ababa University. I have completed essential courses such as Data Structures and Algorithms, Database Management, Operating Systems, Compilers, and Software Engineering.

Addis Ababa,
Ethiopia

Yenetta Code

I participated in a MERN Stack bootcamp at Yenetta Code, where I gained valuable experience working alongside experienced developers

PROFESSIONAL EXPERIENCE

Internship

09/2023 – 01/2024

Ministry of Innovation and Technology

During my internship, I spearheaded a project aimed at modernizing the inventory management system of the Ministry of Innovation. The project involved transitioning from manual methods to a computerized system. Leveraging web-based PERN (PostgreSQL, Express.js, React.js, Node.js) technology, we successfully implemented the solution, streamlining inventory processes and enhancing efficiency.

PROJECTS

Tabor Car Rental Service

10/2023 – 12/2023

Tabor Car Rental Service was a project aimed at enhancing the ease and efficiency of car rentals while offering a wide variety of vehicles at affordable rates through a user-friendly website interface. It is a React Project

VoyageVue

09/2023 – 10/2023

During the A2SV African AI Generative Bootcamp, I contributed to the development of VoyageVue, a web-based application aimed at enhancing urban commuting experiences through Generative AI technology. I played a key role in crafting its user interface using React, Redux, and Material-UI, ensuring a seamless and intuitive user experience

Restaurant-menu

04/2023 – 05/2023

I conceptualized and executed this project to revolutionize the restaurant menu system. Utilizing my proficiency in HTML and CSS, I meticulously designed and developed a custom solution tailored to the unique needs of the restaurant industry. Through my efforts, I ensured that patrons could seamlessly navigate the menu, placing orders effortlessly while enjoying an intuitive and visually captivating interface

SKILLS

Technical Skills:

- . Programming Languages (e.g., Python, Java, JavaScript)
- . Web Development (HTML/CSS, React.js, Node.js, Redux)
- . UI Design (Figma)
- . Version Control (Git)
- . Styling Frameworks (Bootstrap, Tailwind CSS, Material-UI)
